Ideation Phase

Empathize & Discover

Date	29-09-2026
Team ID	SWTID-2026-3846
Project Name	Streamlining IT procurement : Automating standard team
Maximum Marks	4 Marks

Empathy Map Canvas:
An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map - IT Procurement User:

What does he THINK and FEEL? • Worried about missing project deadlines due to software access delays. • Wants a transparent, quick, and hassle-free IT approval system. • Feels annoyed by long wait times for basic tools.	**What does he SEE?** • Multiple spreadsheets and manual email approvals across teams. • Lack of a centralized tracking dashboard for request status. • Colleagues facing similar delays for standard software licenses.
What does he HEAR? • "It takes weeks to get access to standard IT tools." • Management wanting cost control and better visibility. • Procurement team complaining about ticket overload.	**What does he SAY and DO?** • Follows up constantly via emails and messages to speed up approvals. • Requests an automated, single-click request workflow. • Tries to find temporary workarounds while waiting for official approvals.
PAIN • Delayed work productivity. • Lack of visibility on request progress. • Tedious manual approval steps.	**GAIN** • Automated instant approval for standard requests. • Clear tracking and transparency. • Increased work efficiency and faster turnaround.
